

**COATING** is a new option towards traditional upholstery. Here we are able to spray the coating directly onto a CNC cut foam shape. The advantages are that we can spray more complex shapes, different sizes and in any color. Because we spray, the object is seamless and watertight. The coatings are flexible and have a soft touch feeling.

**COLLECTION** For the collection we work together with internal and external designers from all over the world. This leads towards complex shapes and surprising designs. From basic poufs to our famous Clifty range designed by our good friend Rainer Mutsch. We try to go beyond the cutting techniques.

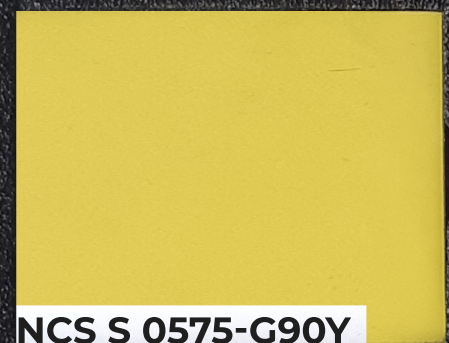

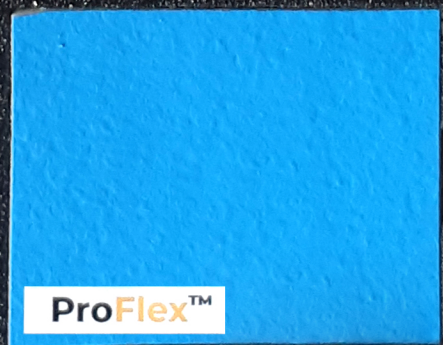

**CUSTOM WORK** Apart from our standard collection we offer our custom work to architects and designers. You can send us YOUR design, a STEP / DWG file where you have the freedom to adapt the shape and size. No setup costs or expensive molds needed here. We offer 30 standard colors free of charge, but if you can't find your color of choice, we provide every RAL and NCS color codes. [view full collection > www.sixinch.eu](http://www.sixinch.eu)

## COLORS

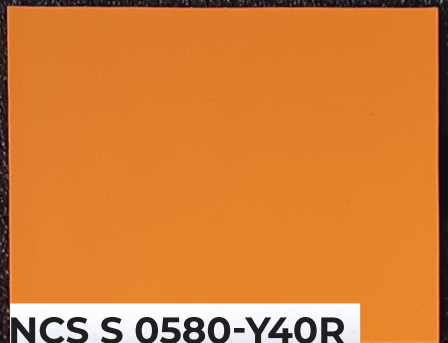

Colors can be chosen between **all colors** of the **NCS** and **RAL** color systems. Non-standard colors will be charged, our **30 STANDARD COLORS** are free of charge
