HEX
DESIGN BY STEVEN VAN DER WERF

JACOBS
DESIGN BY STEVEN VAN DER WERF

JACOBS: Invented
a kind of ergonomic
chair which could
be used with people
of different heights.
The chair brought in
a revolution: people
could now sit on
chairs without
the danger of
falling. And it
was the first chair
with a study bench.

TYPES OF COATING

SOFT COATING

SoftFlex

Our first coating, colored into the mass with a UV stable pigment, 3-6 layers build up, inside use, medium strong, Bumpy surface

FlexPlus

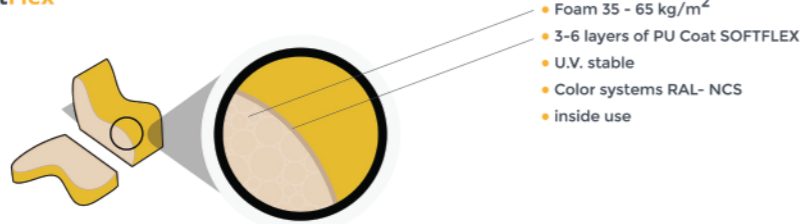

Advanced coating system, a 3 layer system, with an elastic PU, and also a UV stable end-lack, indoor / outdoor usage, very strong, smooth surface and has a "soft touch" feeling

HARD COATING

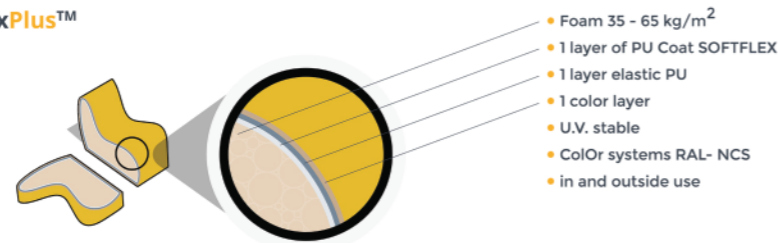

HardCoat

Based onto the same technique as the Flex Plus, but with different chemicals it provides a solid hard topcoat to be compared as polyester. Indoor / outdoor usage, also with a UV stable end lack.

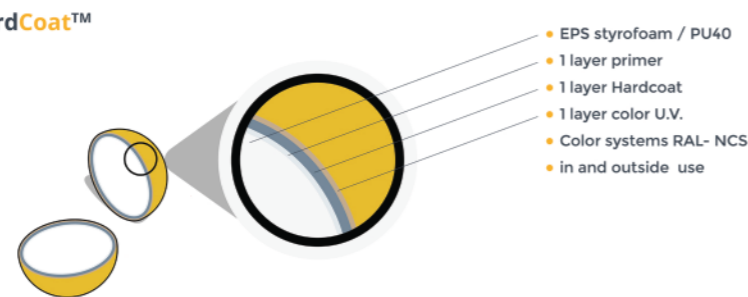

1 SoftFlex™

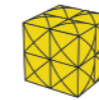

2 FlexPlus™

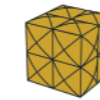

3 HardCoat™
