FOAM COATING**

SIXINCH stands for creativity, design, flexibility and innovation. We represent fun in every aspect of the word. We are constantly exploring innovative materials and progressive design - and it's through the combination of both that SIXINCH was born. SIXINCH specializes in the design and manufacturing of high concept foam coated furniture and architectural products. Our mission is to create dramatic impact with innovative design and deliver the highest quality foam coated on the market. With SIXINCH, the freedom and possibility to turn your creativity into reality truly makes the sky the limit.

"WE ALL HAVE CREATIVITY IN THE 'SPACE BETWEEN OUR EARS', A SPACE 150MMS WIDE OR TO PUT IT MORE SUCCINCTLY - A GOOD SIX INCHES."

Pieter Jamart *Founder/designer*

Pieter studied Interior and furniture design at Luca's fay'd herbe academy Mechelen Belgium. Passionate about the possibility's of furniture and foam he started research on these materials already during his studies. Pieter graduated in 2002 and immediately started his own company sixinch with his business partner Michel Sels.

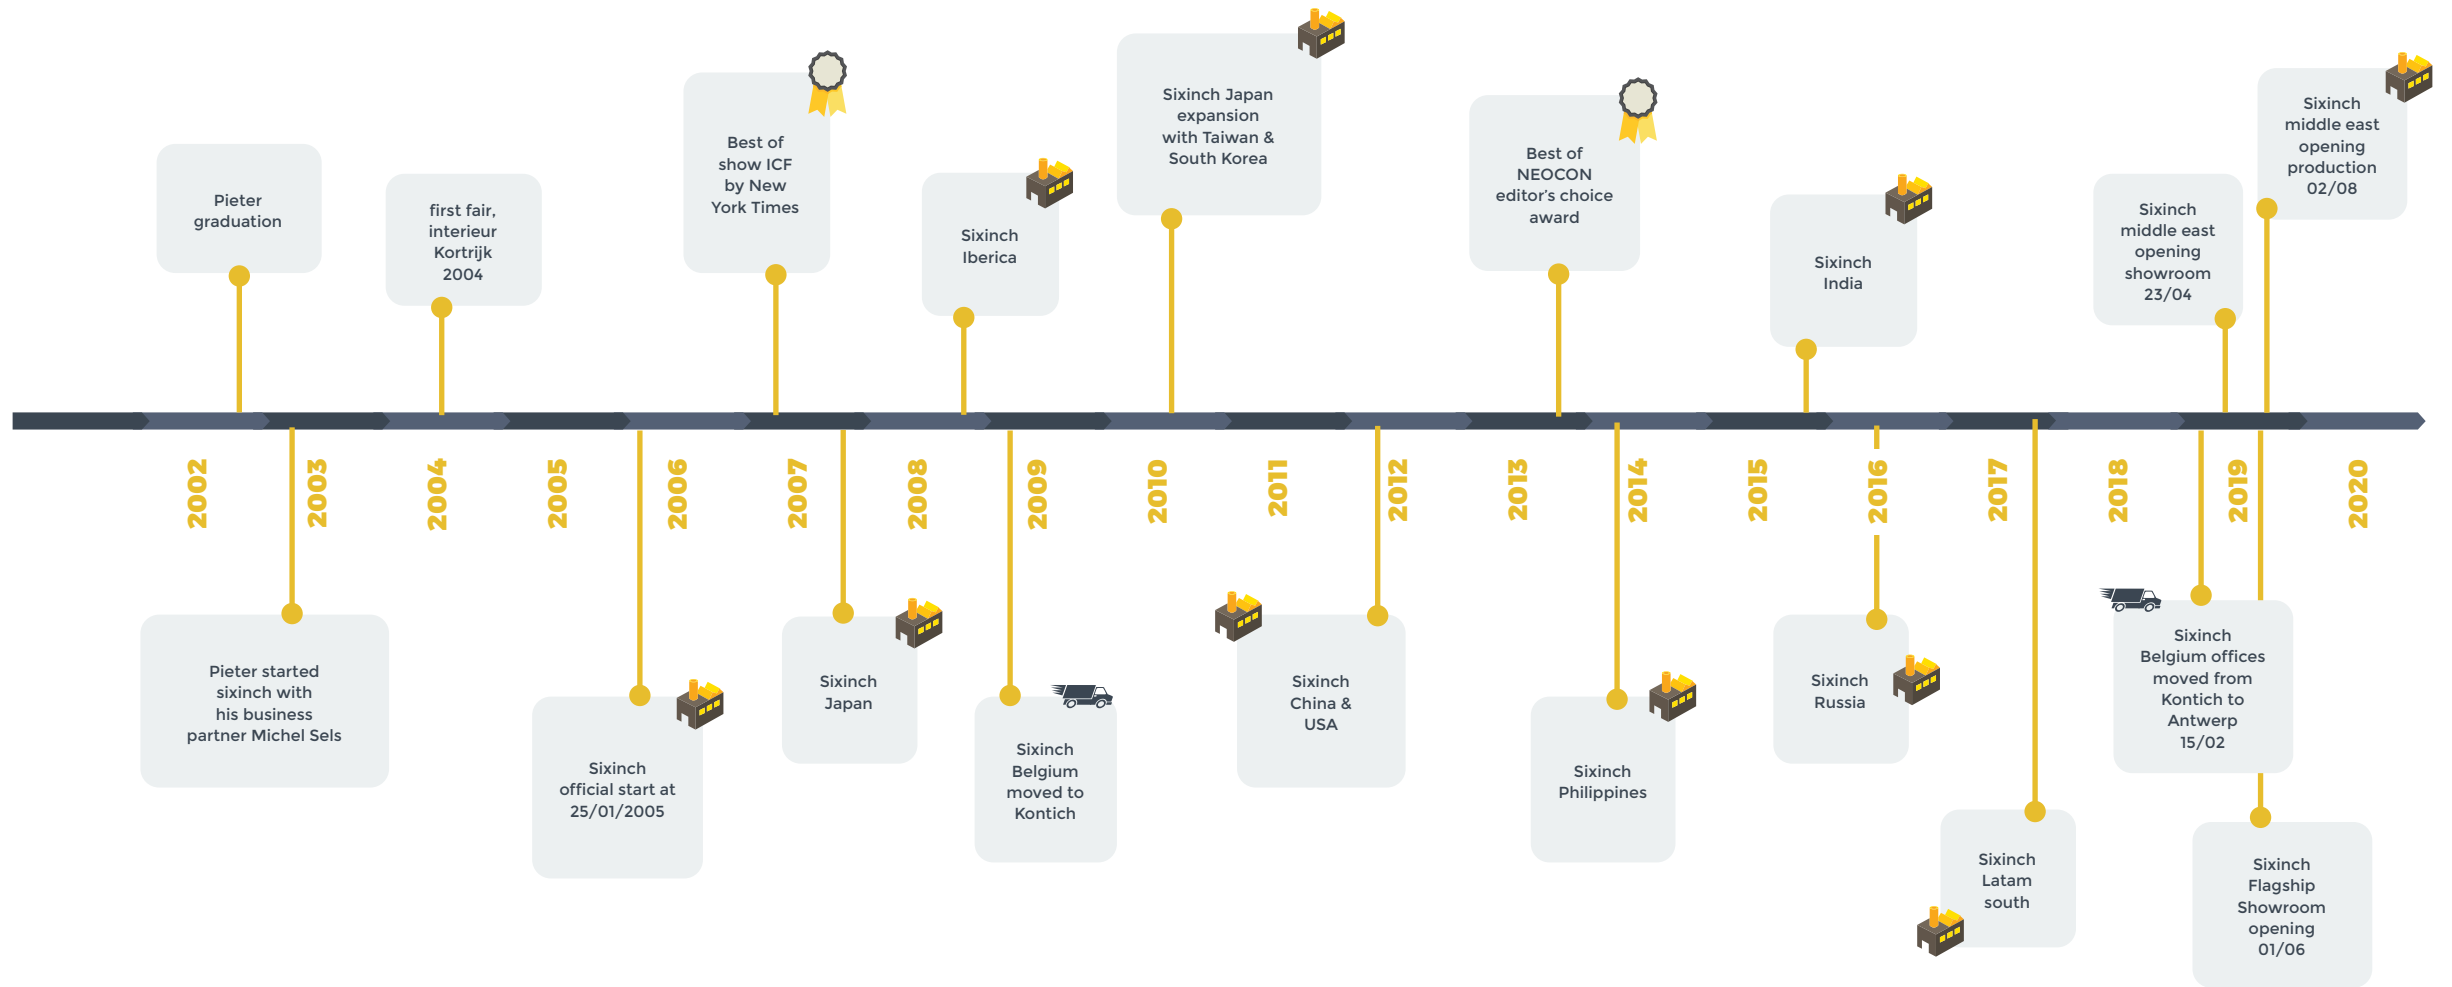

Michel Sels *Founder/sales and numbers*

Michel is an entrepreneur who started his carrier in the display and mannequin industry, he supplied the showrooms of Dries van Noten, Walter van Beirendonck, ann Demeulemeester and many others. He also had his own mannequin manufacturing company ACB display's. In 2002 when he met Pieter Jamart and share the same passion for foam and coating sixinch was born.

7 WHAT IS COATED FOAM ?

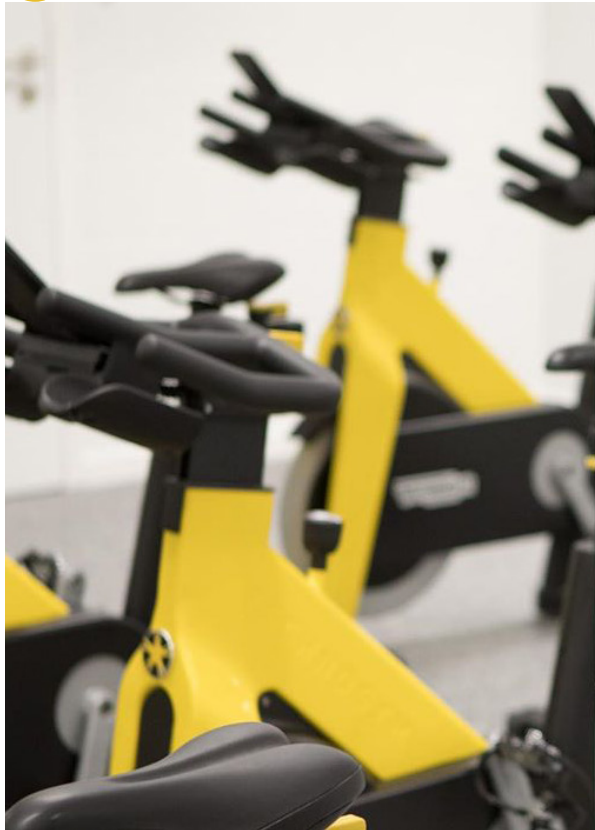

Basically our soft foam can be cut in any shape or dimension and coated in any possible color, our foam and coating are very flexible, seamless and waterproof there is no molding or setup cost involved, the possibilities are endless. Our full customizable shapes don't have any stitches or inner structure they exist only out of foam and coating so basically anybody can be a designer. With SIXINCH, the freedom and possibility to turn your creativity into reality truly makes the sky.

13 HOW DOES IT WORK?

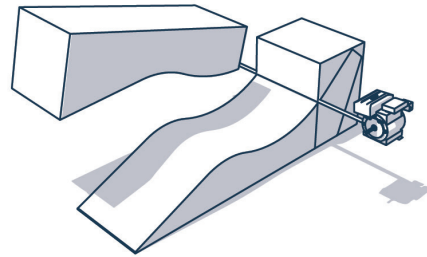

01 Design Create.

Enjoy the liberty to sketch / CAD drawn your own custom design. This design will be converted in to a DXF or DXG file and exported in the CNC cut machine of the foam supplier.

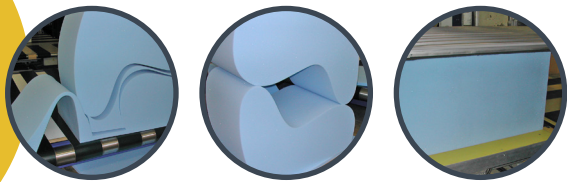

02

Foam cutting

When the file is imported the CNC cutter is getting to work and cuts your design out of a big block of foam of the chosen density. After a very short amount of time this is done and the foam is ready for the next step.

No molds
or
startup
cost

almost every shape
and design is possible!!

03

COATING

Make sure the foam is clean to start with the 3 layer coating. First layer is the primer who gives the adhesion to the foam and closed the wholes. Second layer is a high quality PU layer which gives the strength to the coating. Last layer is the soft touch topcoat / color layer. This coating cures overnight and is ready to ship the next day .

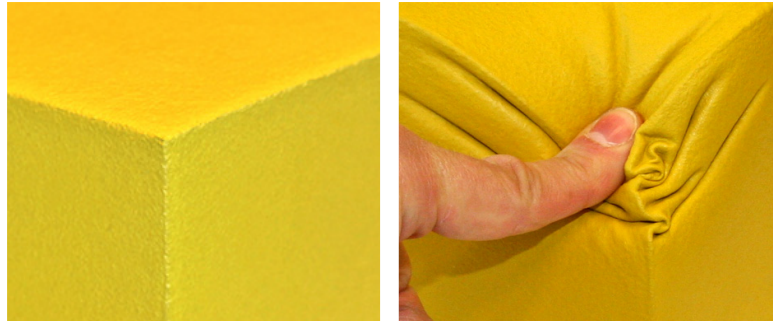

14 TYPES OF COATING

01

SoftFlex ®

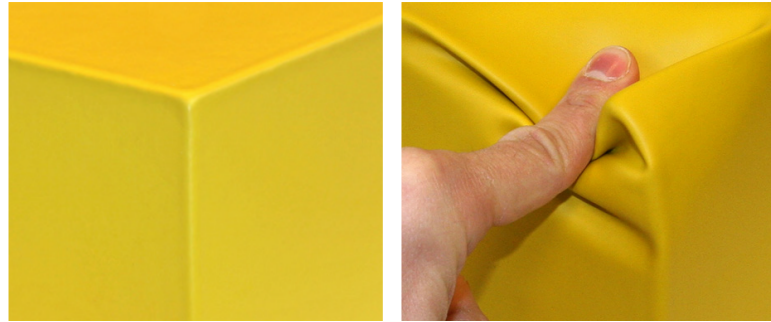

Soft Flex is colored into the mass with a UV stable pigment, 3 - 6 layers build up, only for indoor usage, medium strong, surface always bumpy due to the product.

02

FlexPlus ®

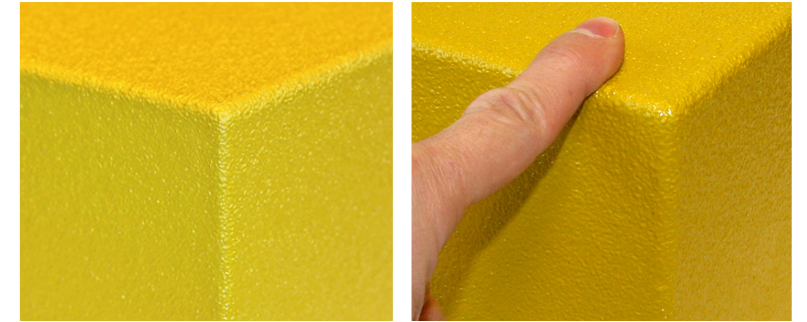

Flex Plus is an advanced 3 layer coating system, with an elastic PU, the endlack has a special soft touch feeling, also here a UV stable pigment, very strong, indoor / outdoor usage, smooth surface.

03

HardCoat ®

Based onto the same technique as the Flex Plus, but with different chemicals it provides a solid hard topcoat to be compared as polyester. Indoor / outdoor usage, also with a UV stable end lack, slightly bumpy surface, extreme strong.

UNIQUE PRODUCT

Sixinch coated foam furniture has unique features unlike any other material.

- ✓ **Water-/ liquid proof**
- ✓ **Seamless**
- ✓ **All colours (ral or ncs)**
- ✓ **Almost all shapes possible**
- ✓ **Easy to clean**
- ✓ **In-/ outdoor use**
- ✓ **No set up cost for customization/ no mold**
- ✓ **Floatable**
